

Quality Policy **(Accepted in 2017 by the Executive Board)**

Our quality policy

As all the volunteers in the Association of Evaluation and Accreditation of Medical Education Programs contribute by guiding the medical schools and accrediting the programs to improve the quality of medical education and ultimately improve the health of the public.

The main philosophy of our quality policy is to contribute to continuous evaluation, learning and development culture within the framework of our social responsibilities in medical education institutions.

The institutional values are as follows:

Assurance: Our main purpose is to assure all stakeholders and the society about the quality of the medical education in Turkey and the region.

Continuous Learning and Development: TEPDAD Develops its own internal processes and services that are continuously lead to learning from their own work and experience of other institutions.

Participation and Collaboration: In all activities TAPDAD, the participation is based on the participation, search and improves cooperation opportunities based on mutual trust, respect and openness with national and international organizations. For a sustainable cooperation, it is essential that the targets are shared among the cooperation partners, to work together and establish a relationship between expertise, resources and information, and a relationship between each other.

Human and Service Focus: All institutions they offer TEPDAD Volunteers provide an honest, respectful, sincere relationship with all individuals in all institutions. They are clear to the expectations and requirements of institutions and individuals, are sensitive to feedback and evaluation.

Transparency, Accountability and Social Obligations: TEPDAD has the responsibility to be transparent in all activities and informs the society.

Ethical Approach: TEPDAD volunteers accepts to practice the highest level of ethical principles within the framework of social obligations and behave in accordance with the TEPDAD ethics rules.
